Sir/Madam,

This letter is an application for the position of Java programmer Assistant. I have more than 2 years of professional experience in software industry. I have worked on most of the mentioned technologies which are required for this job. I am a Software Engineer major and updating my skills with new technologies in market. This position would allow me to gain some valuable experience in software technologies.

During my last job, I worked on Angular JS and node JS for one of the telecom clients and also used AWS services like EC2, RDS, S3. In this semester, I am working with react, redux, nodeJS, mysql and different AWS services to build a full stack application. I also enrolled for frontend designing class which is helping me learning front end technologies in depth. I am confident I will be an asset to your organization. I enjoy being challenged and engaging with projects that require me to work outside my comfort and knowledge set, as continuing to learn new languages and development techniques are important to me and the success of your organization.

I've attached a copy of my resume that details my projects and experience in software development. I can be reached anytime via my cell phone, 314-319-4690 or via email at puneetjyot.khurana@sjsu.edu.

Thank you for your time and consideration. I look forward to speaking with you about this opportunity.

Sincerely,

Puneet Jyot Singh Khurana
